Access fob

3 ADJUST THE HANDLE DIRECTION

The smart door lock is suitable for both left-hand and right-hand opening doors, as shown in the figure below. Using a screwdriver, loosen the screw, rotate the handle 180 degrees, and then tighten the screw again.

Note: Do not remove the screw inside the handle hole. Any damage caused by doing so will not be covered under warranty.

5 ACCESSORIES FOR VARIOUS DOOR THICKNESS

This product is suitable for door thicknesses between 35 mm and 55mm. If your door thickness falls outside this range, please contact us for further assistance. Be sure to select the correct accessories based on your specific door thickness.

Code and name	Specifications(mm)	door thickness ranges & QTY	
		35≤M≤40(mm)	41≤M≤55(mm)
6 Spindle 80(mm)	80	1	1
10 Screw 4.2X25(mm) (wood door only)	25 30 35 4.2	4	4
7 Screw M4X30/45(mm)	30 45 M4	1	2
2 Threaded screw post 30/35(mm)	30 35	1	2

RECOMMENDED: LOCK SETUP WITH APP

It is highly recommended to set up the lock using the McGrathlocks app.

The app simplifies programming and provides an easier way to manage your locks.

DOWNLOAD & INSTALL

Manual set up via keypad only

Please follow the instructions below to manually program the lock using the keypad.

You can add a BLE device after the lock is programmed manually provided you know the admin code.

*83#

>

Admin code#

>

Add lock via APP

CREATE NEW ACCESS

Add administrator (only 1)

*12#

>

123456#

>

New Code#

>

New Code#

- a. Enter *12#
- b. Input 123456# (the default code)
- c. Input new code#
- d. Repeat new code#

Add a new user with an access / pin code (250 maximum)

*80#

>

Admin Code#

>

New Code#

>

New Code#

- a. Enter *80#
- b. Input admin code#
- c. Input user code# (6-9 digits)
- d. Repeat new user code#
- Tips: If you use the APP a 4 digit user code can be set.

Add a new user with an RFID card (1000 maximum)

*80#

>

Admin Code#

>

RFID

- a. Enter *80#
- b. Input admin code#
- c. Present the card to the card sensor area

Add a new user with fingerprint (100 maximum)

*80#

>

Admin Code#

>

Input Fingerprint

- a. Enter *80#
- b. Input admin code#
- c. Present fingerprint several times according to the voice guide.

MODIFY CODE

Modify admin code

*12#

>

Admin Code#

>

New Code#

>

New Code#

- a. Enter *12#
- b. Input old admin code#
- c. Input new admin code#
- d. Repeat the new admin code#

Modify user code

*10#

>

User Code#

>

New Code#

>

New Code#

- a. Enter *10#
- b. Input old user code#
- c. Input new user code#
- d. Repeat the new user code#

DELETE USER

Delete specified pin code

*72#

>

Admin Code#

>

Specified code#

- a. Enter *72#
- b. Input admin code#
- c. Input the specified code# that you wanted to delete
- Tips: The admin code cannot be deleted.

Delete all fingerprints

*70#

>

Admin Code#

- a. Enter *70#
- b. Input admin code#

Tips: The admin code cannot be deleted.

Delete all user codes

*71#

>

Admin Code#

- a. Enter *71#
- b. Input admin code#

Delete all RFID cards

*69#

>

Admin Code#

- a. Enter *69#
- b. Input admin code#

MANAGE VOICE

Turn on the lock voice

*30#

>

Admin Code#

>

1#

- a. Enter *30#
- b. Input admin code#
- c. Input 1#

Turn off the lock voice

*30#

>

Admin Code#

>

0#

- a. Enter *30#
- b. Input admin code#
- c. Input 0#

RESET THE LOCK

Press and hold the reset button until you hear “please input initialization passcode” then input 000#. All pin codes, cards, BLE and fingerprint users will be deleted.

DEMO MODE

Demo mode is turned off by default prior to an Admin code being registered. If you wish to turn on demo mode input 24679#. Demo mode sets the lock access pin code to 123456# and any card or fingerprint will also open it. Registering an Administrator will take the lock out of demo mode.

LOW BATTERY ALERT

When battery power is less than 4.8V you will hear a low battery alert each time you wake the lock screen. Please replace batteries with new Alkaline type. Don't mix old and new batteries.

SCRAMBLING CODE FOR ANTI PEEP

Users may enter any random digits before or/and at the end of entering their correct pin code and still gain access. This feature makes it harder for an unauthorised user who may be watching you to guess your pin code.

INCORRECT CODE / CARD ALERT

If the wrong unlocking information is inputted five times the system will be locked out for 2 minutes. The lock can only be operated by the APP during the lockout period.

PASSAGE MODE

Passage mode keeps the door unlocked, useful when gardening or bringing in groceries from the car etc.

To activate passage mode, enter a valid unlock code then press 123# within 5 seconds. The door will remain unlocked.

To remove from passage mode, unlock using a valid code or card. If you engage passage mode via the APP you must use the APP to disengage passage mode.

FAQS

Keypad on lock does not respond

1. Please check the batteries are installed correctly.
2. If the lock had been working OK, please replace the batteries with new AA Alkaline type.

The door will not lock

1. Ensure the lock is not in demo mode.
2. Check to see if the lock is in passage mode.
3. Refer to installation guide to ensure the triangle on the lock hub is in correctly aligned.

Battery performance is poor.

1. Ensure all batteries are new Alkaline type.
2. Ensure the lock connecting cable is not pinched.
3. Check for and update lock firmware.

GATEWAY

Gateway type

G2/(Wi-Fi)
Network: 2.4GWiFi

G3/G3P(PoE)
Network: RJ45

G4(4G)
Network: LTE (4G)

G5(Wi-Fi)
Network: 2.4G/5GWiFi

ADD GATEWAY

1. Open the McGrath Locks app and log in to your administrator account.
2. Tap the menu icon (≡) in the top left corner of the home screen.
3. Select 'Gateway' from the sidebar menu.
4. Tap the "+" symbol in the top right corner.
5. Choose your gateway model from the list provided.
6. Connect the gateway to power, while the light is alternatively flashing red and blue, press the "+" symbol.
7. Select the network required, enter the Wi-Fi password, enter the gateway name.

Notice: If the process times out, please disconnect from power and try again.
*Gateway coverage distance: 10 meters without obstruction

Gateway functionality

The gateway is an accessory for the lock that connects it to the network. With a gateway connected you can remotely manage the lock, such as opening the door or deleting a passcode.

GatewayFunctions

	Without Gateway	With Gateway	The door lock can function normally without a gateway. However, to remotely modify or delete pin codes, issue fingerprints or cards, open the door remotely and access other features, a gateway is required.
